#### Model - GRF20S

## **Description**

The GRF20S springloaded pressure regulator reduces the supply pressure on the inletside to a controlled pressure on the outletside.

## **Specifications**

Inlet pressure 50, 280 or 420 bar

Adjustable 0-420 bar

Connections DN20 flanges EN 1092-1 or

3/4" flanges ANSI B16.5

Seatdiameter 12,5 mm Cv / Kv Cv 3.2 / Kv 2.7

#### **Fluids**

This pressure regulator is suitable for gases and liquids.

#### **Materials**

The regulator is made out of barstock stainless steel material.

Body ss 316L Springhousing ss 316L Valve ss 316L

Seat KEL-F, PEEK or rubber

Valve spring ss 316 Setspring ss 302

O-rings / diaphragm NBR, FKM or EPDM

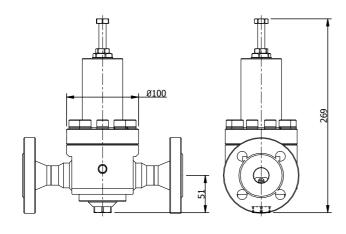

Other materials available on request.

All metal parts are marked with a traceable batch number. Material certificates are available on request.

## **Temperature**

The general temperature range of the regulator is -50 / 200 °C, but could be limited due to the used sealing materials.

KEL-F seat	-15 / 60 °C
PEEK seat	-50 / 200 °C
NBR seals	-35 / 130 °C
FKM seals	-20 / 200 °C
EPDM seals	-50 / 120 °C

#### Model - GRF20S

#### **Technical details**

- all regulators tested before delivery
- leak-tight seat design
- all parts cleaned and degreased
- PED classification SEP
- ATEX classification EXII 3GD

Although this regulator has a leak-tight seat, the regulator should not be used as a shutt-off valve.

Spare parts kits are available for the regulator.

#### **Dependency**

A character of the regulator is "dependency". The set-pressure will change, when you have a changing inletpressure.

#### **Options**

Dutch Regulators supplies the regulators to your needs. When you have the need for special features or options, Dutch Regulators is the right address.

#### **Standard options**

- · gauge ports
- locking cap

## **Special options**

- other seal materials on request
- other body materials on request
- material according to NACE MR0175

#### **Flow**

The regulator has good flow performance over the complete range of inlet and outlet pressures. Always ask Dutch Regulators for advice, if this regulator is the best choice for your application.

## **Adjusting the regulator**

The regulator comes standard with a setscrew.

Regulators that have a fixed setpoint, can be equipped with a locking cap.

#### Model - GRF20S

#### **Section view**

The section view gives an idea of the internals of the regulator.

- diaphragm sensing below 8 bar outletpressure
- piston sensing above 20 bar outletpressure
- rubber seated for design pressure below 50 bar
- plastic seated for design pressure above 50 bar

# Standard

Outlet gaugeport

#### **Gaugeports**

The regulator has standard one 1/4" NPT gaugeport to measure the controlled setpressure.

Option G1 and G2 are optional 1/4" NPT gaugeports, see for the position the pictures below.

On request it is possible to have other gaugeports.

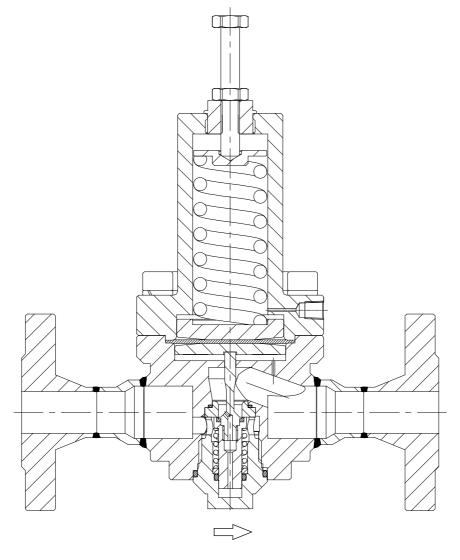

### Option G1

Extra Outlet gaugeport

#### **Option G2**

Extra
Inlet gaugeport
and
Outlet gaugeport

Section view of: GRF20S-40D8-SSNN

#### Model - GRF20S

#### **Connections**

The regulator is designed for flanged connections. The flanges are welded to the regulator with butt-welds.

#### DIN – flanges according to EN 1092-1

DN20 PN40 40 bar design pressure

#### ANSI - flanges according to ANSI B16.5

3/4" 150#	20 bar	design pressure
3/4" 300#	50 bar	design pressure
3/4" 600#	100 bar	design pressure
3/4" 1500#	280 bar	design pressure
3/4" 2500#	420 bar	design pressure

Other connections like weld-stubs for example are available on request.

#### **Mounting holes**

The bottom of the regulator has two mounting holes M6 with 8 mm thread and a C-C distance of 50 mm.

#### **Design pressures**

The regulator range consists of 3 design pressure ranges, where the design pressure applies for the inlet and outletside.

The design pressure could be limited to the maximum pressure of the flanges.

The design pressure comes standard together with specific seat materials.

50 bar - NBR, FKM or EPDM

280 bar - Kel-f
 420 bar - PEEK

Depending on temperature or special wishes, the seatmaterial could be different as mentioned above.

# **Typenumber explanation**

Example: GRF20S - 40D8 - SSNN - L
